GDPR Readiness Assessment

The General Data Protection Regulation comes in to force in May 2018

Here at Armadillo we believe that technology alone isn't the solution to delivering a secure infrastructure in which to store your key data assets and operate your business. As the weakest link, people and processes form the cornerstone of any security strategy and therefore we seek to understand this dynamic in the delivery of the Global Data Protection Regulation Readiness Assessment.

GDPR isn't an IT issue - it's a business issue and therefore we spend time with key stakeholders from across your business to build a picture of how you operate, and assess your compliance with GDPR. We then provide a dashboard based report showing your readiness and identifying gaps and remediation required.

Our Methodology

The assessment is delivered through workshop and 1:1 meetings with key business stakeholders to capture current data protection practices and workflows.

From this we review your data protection maturity, including:

- Personal Data & Sensitive Personal Data used in the business
- Locations of PD and SPD
- Classification and cataloging of PD and SPD
- Accessing PD & SPD
- Processing of PD & SPD
- Privacy Impact Assessments in place
- Incident / Breach detection
- Incident / Breach response
- Security Controls in place

Fines of up to 4% of global turnover or €20m, whichever the greater can be levied in the event of a breach

ASSESSMENT DELIVERABLES

Following the assessment we provide you with a dashboard report setting out your compliance status and advising on the steps required to close compliance gaps and mitigate risks.

Our report covers:

- Compliance with key GDPR requirements
- Gaps and areas of non-compliance
- Remediation steps to be undertaken
- Recommended technology solutions

Engagement Length

Our GDPR Readiness Assessment is a 3 day high level engagement. A more detailed review is also available - typically taking 5 days and providing a more detailed report showing the maturity against key requirements.

KEY FACTS

- GDPR is a common set of guidelines to control and protect Personally Identifiable Information
- Covers all countries that process or hold personal data of EU citizens
- Comes into law 25th May 2018 (prior to Brexit)
- Fines of up to 4% global turnover or €20,000,000

Brexit doesn't mean you don't need to comply with GDPR - we will still be governed by EU Law when it becomes a requirement

About *armadillo*

Armadillo is a new breed of cyber security practice. We focus on enabling businesses to conduct their business in confidence, without fear of security attack and without compromising how they operate.

We go beyond cyber security to build cyber resilience that helps you detect, withstand and respond to security attacks, whilst enabling you to stay focused on achieving the outcomes your business demands. We consult on resilient cyber security that works in tune with your business, help you to deliver on this vision and get ahead of attacker innovations through flexible security solutions, services and expert advice on emerging technologies.
